February- Launch Strategy

Consultation

- [Draft EPSRC healthcare technologies strategy 2022 – UKRI](#)
- Feedback on the draft strategy through an open consultation.
- We are seeking responses on the following specific sections:
 - the challenge descriptions
 - the example research priorities
- The open consultation runs to 1 December at 4pm.
- To provide feedback, complete the [healthcare technologies strategy 2022 consultation form](#).

Vision

The healthcare technologies' theme vision is to accelerate advances in transformative engineering and physical sciences research to have an impact in health and ultimately enable people to live healthier lives.

Mission

We will deliver impact through **high quality** engineering and physical sciences research which is **co-created** with end users, stakeholders, and the public in the following challenge and priority areas:

advancing prevention

transforming prediction and
early diagnosis

discovering new interventions

We will encourage and support **disruptive and transformative ideas** in engineering and physical sciences research with the potential to deliver a step change for healthcare.

We will **support and attract people** from a diverse population to build capacity for future skills requirements in healthcare technologies.

New Strategy
